Faith and Ethics. The Theology of H. Richard Niebuhr. P. Ramsey, Editor. [By Various Authors. With a Portrait and a Bibliography.] 1957

ultimately or so h richard niebuhr wrote as early as 1929 the problem of church and world involves us in a paradox unless the church accommodates itself to the world it becomes sterile inwardly and outwardly unless it transcends the world it becomes indistinguishable from the world and loses its effectiveness no less surely in the same context he went on to state the rhythm of approach and withdrawal need not be like the swinging of the pendulum mere repetition without progress it may be more like the rhythm of the waves that wash upon the beach each succeeding wave advances a little farther into the world with its cleansing gospel before that gospel becomes sullied with the earth niebuhr s thought on the paradox of church and world is an essential piece of our understanding of twentieth century theology in america in this volume jon diefenthaler collects for the first time over forty writings

that trace the lineage of niebuhr s thought presents them in a single place and makes a case for their enduring value in a post church religious environment the volume is a treasury of little known and hard to find pieces making scholarship and understanding easier
