controlled by a number of different interacting processes there are also detailed reviews of the biology and chemistry of the rhizosphere factors affecting the bioavailability of different trace elements in soil potential phytoremediation methodologies and other applications résumé de l éditeur cultural and historical attractions are principal factors generating tourism trips and this has spurred the growth of a large heritage industry however the character and behaviour of heritage tourists and their social and economic impact on their destinations is as yet little understood richard prentice presents a detailed analysis of heritage tourism by examining the way the benefits gained from visits to attractions are consumed this exploration into the nature of the heritage product calls into question the terminology used to define this aspect of the tourism industry and richard prentice argues that it is all too easily regarded as a homogenous industry when in fact it covers diverse attractions which serve diverse tourism and leisure markets a more sensitive approach to such questions as the promotion of these attractions their retailing role their sustainability and their educational impact is needed within the industry the author shows that the demands of tourists their socio economic background and the decision making processes involved all have implications for the management and marketing of tourism he analyses the benefits that tourists seek when visiting heritage attractions and measures their

reactions to the presentation of such sites  
asking how informed tourists are and what sort  
of promotion they respond to by setting up a

model of the heritage user he attempts to  
identify key features which should influence

tourist operators seeking to understand the  
behaviour of their tourist visitor and respond  
effectively
